TRAINING THAT DEVELOPS *REAL* CAPABILITY

GMP for Manufacturers of Finished Pharmaceuticals

LS015

GMP for Manufacturers of Finished Pharmaceuticals

This programme is available In-House and currently delivered through virtual classroom training.

Good Manufacturing Practice is a system for ensuring that products are consistently produced and controlled according to quality standards. It is designed to minimize the risks involved in any production process that cannot be eliminated through testing the final product. GMP covers all aspects of production from the starting materials, production process, production controls, premises and equipment to the training and personal hygiene of staff.

This involves ensuring that systems are in place to provide documented proof that correct procedures are consistently followed at each step in the manufacturing process - every time a product is made. GMP compliance is widely-accepted as the best way to conduct business, putting product quality first. Implementation of GMP is an investment in good quality product. It is more expensive finding mistakes after they have been made than preventing them in the first place. GMP is designed to ensure that mistakes do not occur. Regulations governing the production of pharmaceutical products require that all staff involved in product manufacture receive ongoing training in Good Manufacturing Practices.

This programme is customised for each company in order accommodate specific in house challenges they are experiencing. This course material is put together based on the clients information, trends, pictures etc in order to illustrate the positives and weaknesses of practices & GMP within their facility.

Generally, an on-site visit is performed first in order for the tutor to gain an understanding and some experience in the specific areas the company would like covered. Exercises can be developed around these in order to enhance the learning experience.

Duration & Price

Duration: 1 day
Delivery mode: This programme is available In-Company

Dates & Locations

In-Company training programmes are customised for your organisations specific needs. Most In-Company training is now delivered virtually.

In-Company Training

Please contact us for more information on our In-Company training options
