Who should participate?

This is an introductory course that is beneficial for those who are new or have just entered project management. It may be of particular benefit to those who have been working in project teams and are now looking to enhance and expand their skill set and move into a project management position.

What will I learn?

Participants achieve the following learning outcomes from the programme;

- Identify and classify project characteristics
- Understand the benefits of effective project planning and control and describe the key characteristics of each
- Define project objectives and create a project scope plan
- Describe how a work breakdown structure is used as an input to developing a project plan
- Apply the principles behind time and cost estimation
- Understand the different components of a project schedule and how these can be applied
- Deliver an effective project management plan
- Describe efficient tools and techniques for controlling project performance
- Use a practical process to manage project risk
