Good Laboratory Practice (ISO 17025:2017 QMS Requirements)

ISO 17025 is a Quality Management System that can be applied by testing and calibration laboratories to ensure that laboratory testing is planned, performed, monitored, recorded and reported in an organised and controlled manner. This course looks specifically at the effective application of all elements of a laboratory quality management system in detail, as per ISO 17025:2017 General Requirements for the Competence of Testing and Calibration Laboratories.

So, whether you have achieved your ISO 17025:2017 accreditation, are implementing ISO 17025:2017 to achieve accreditation or are just implementing a quality management system within a lab, this course provides training for all laboratory personnel who wish to demonstrate that they produce test results that are fit for purpose, have confidence in the results reported and which stand up to the scrutiny of laboratory accreditation bodies and customers.

Duration & Price

Duration: 1 day

Public Virtual Training: €395

Delivery mode: This programme is available In-Company, and via Public Virtual Training

What's covered?

- Course Objectives & Introduction
- The function & purpose of a quality management system
- ISO 17025:2017 all sections will be discussed in detail
- Laboratory Accreditation Process

The tutor is experienced in auditing against this standard and so will share experiences on expectations and outcomes from this standard in practice.

Who should participate?

The course is suitable for all personnel who work within a laboratory or who may need a refresher of the ISO 17025:2017 requirements. It is suitable for labs who already have accreditation or who maybe considering accreditation or implementing a quality management system in their lab.

What will I learn?

Participants achieve the following learning outcomes from the programme;

- Understand the purpose of a quality management system
- Gain an appreciation of all of the elements of ISO 17025:2017 in order to ensure the
 effective running of a testing and calibration laboratory and to have confidence in the
 results reported.
- Awareness of what auditors may look for and non conformances obtained.
- Be able to competently apply these requirements in the day to day activities.

How do we train and support you?

In-House Courses

For In-House courses, the tutor will contact you in advance to discuss the course programme in more detail in order to tailor it specifically for your organisation.

Course Manual

Delegates will receive a comprehensive course manual.
