REAL CAPABILITY

Value Stream Mapping

LSS022

Value Stream Mapping

With the ever-increasing pressure and requirement to improve processes and reduce costs across all industrial sectors, Value Stream Mapping is a powerful enabler in identifying and addressing these valuable opportunities in any organisation's processes. In particular, it focuses on pinpointing waste in processes. Waste is anything that impedes the flow of a product or service as it is being transformed in the value chain.

A Value Stream Map is defined as all the actions (both value added and non-value added) required to bring a product/service through the main process flows essential to each. A Value Stream Mapping exercise facilitates the visualisation and realisation of a future state Value Stream based on comparison with the current state by eliminating the identified wastes.

Duration & Price

Duration: 2 days
Delivery mode: This programme is available In-Company

Dates & Locations

In-Company training programmes are customised for your organisations specific needs. Most In-Company training is now delivered virtually.

In-Company Training

Please contact us for more information on our In-Company training options

What's covered?

- Concept and origins of Lean Manufacturing and the Lean Enterprise and its linkage to Value Stream Mapping
- Mapping the Current State Value Stream Map
- Identifying the Ideal and future state Value Stream Map
- Transitioning from the CurrentState to the Future State Value Stream Map using Value Stream Loops and Implementation Plans

Individual and Team based Classroom Exercises are used to re-enforce learning

Who should participate?

The course is aimed at front line change agents working in the areas of process management, process design or process improvement. It is intended for personnel working to improve processes whether they come from manufacturing, logistics, engineering or purely transactional functions.

What will I learn?

Participants achieve the following learning outcomes from the programme;

- Understand the language and terminology involved in Value Stream Mapping and its linkage to the Lean Enterprise
- Apply the step by step approach deployed in Value Stream Mapping in transitioning from a Current State to a Future State
- Develop detailed implementation plans to realise the future state.
