REAL CAPABILITY

ISO 45001:2018 Implementation
(OH&SMS)

HS016

ISO 45001:2018 Implementation (OH&SMS)

ISO 45001 has replaced OHSAS 18001 and will afford organisations an opportunity to align their strategic direction with their health and safety management system thereby improving their occupational health and safety performance.

Irrespective of whether a company is a manufacturing or service industry, it has a statutory obligation to operate in a manner that safeguards the health and safety of its workforce. Implementation of a recognised occupational health and safety (OH&S) management system such as ISO 45001:2018 is one way to meet that obligation.

This one-day course will be of interest to companies who are considering a systematic approach to meeting this obligation and who require direction on how to implement the standard and what is the mandatory health and safety documentation required by the standard.

The structure of ISO 45001 is based on Annex SL format and terminology. Annex SL was developed to ensure that all ISO management system standards share a common format irrespective of the specific discipline to which they relate.

ISO 45001 has introduced a number of enhanced requirements as follows:

- Understanding the organisational context
- Understanding the needs and expectations of interested parties
- Leadership and commitment
- Participation and consultation
- Documented information
- Eliminating hazards and reducing OH&S risks
- Management of change
- Procurement
- Contractors
- Outsourcing

Duration & Price

Duration: 1 day

Public Virtual Training: €395

Delivery mode: This programme is available In-Company and via Public Virtual Training

Dates & Locations

Coming Soon. Please [contact us](#) to receive notification of next Public Virtual Training Dates.

What's covered?

- Evolution of occupational health and safety management systems
- Comparison of occupational health and safety systems with quality and environmental management systems
- Integrated management systems (IMS)
- How ISO 45001 differs from OHSAS 18001
- How to implement the specific occupational health and safety management-related requirements of ISO 45001
 - Context of the organization
 - Leadership and commitment
 - Health and safety policy
 - Occupational health and safety objectives
 - Hazard Identification and assessment of risks
 - Resources and support
 - Outsourced processes, products and services
 - Operational planning and controls
 - Monitoring, measurement, analysis and evaluation solutions
 - Incidents and emergency situations
- The occupational health and safety management system certification process
- Examples of relevant occupational health and safety management system documentation will be shown throughout the course

Who should participate?

- Health and Safety Officers and Managers
- Technical Managers
- Environmental Manager
- Quality Managers
- Safety Representatives

What will I learn?

Participants achieve the following learning outcomes from the programme;

- Understand the requirements of ISO 45001
- Compare occupational health and safety systems with quality and environmental management systems such as ISO 9001 or ISO 14001
- Understand the concept of integrated management systems (IMS)
- Understand the difference between ISO 45001 and OHSAS 18001
- Develop a suitable occupational health and safety management system for their own company
- Know where to find guidance on OHS management systems

How do we train and support you?

In-House Courses

For In-House courses, the Tutor will contact the Course Organiser in advance to discuss the programme in more detail in order to tailor it specifically to the organisation.

Course Manual

Delegates will receive a very comprehensive course manual.
